

UNICITY PROBIONIC PLUS

Diversity in the microbiome helps improve digestive health, promoting good digestion and supporting body functions such as the immune system.

These probiotic strains are microencapsulated to ensure their survival through to your digestive tract for maximum effect on the body's digestive function.

ProBionic Plus contains eleven probiotic strains that help the body restore the balance of healthy bacteria in your gut. The upgraded probiotic blend features seven new strains of beneficial bacteria for wider microbial diversity.

BENEFITS

- Now with eleven probiotic strains, seven more than ProBionic.
- Promote and restores biodiversity in the digestive tract.
- Helps soothe intestinal discomfort and regulate bowel function.
- Provides support for the body's immune system.

SUGGESTED USE

- Take one packet daily.
- May be consumed on its own, with water, or with other liquids.
